2000+ people

in hubs across Asia, Australia, Europe, North America and the UK

16 out of 20

of the Top 20 Pharma clients that members of our team have worked alongside

80% of our work

from a referral, recommendation or repeat business

22 categories

where we have been recognised by the Financial Times as one of the UK Leading Management Consultants, including **in Chemicals & Pharmaceuticals and Healthcare & Life Sciences (2026)**

Putting people first. Creating impact that lasts.

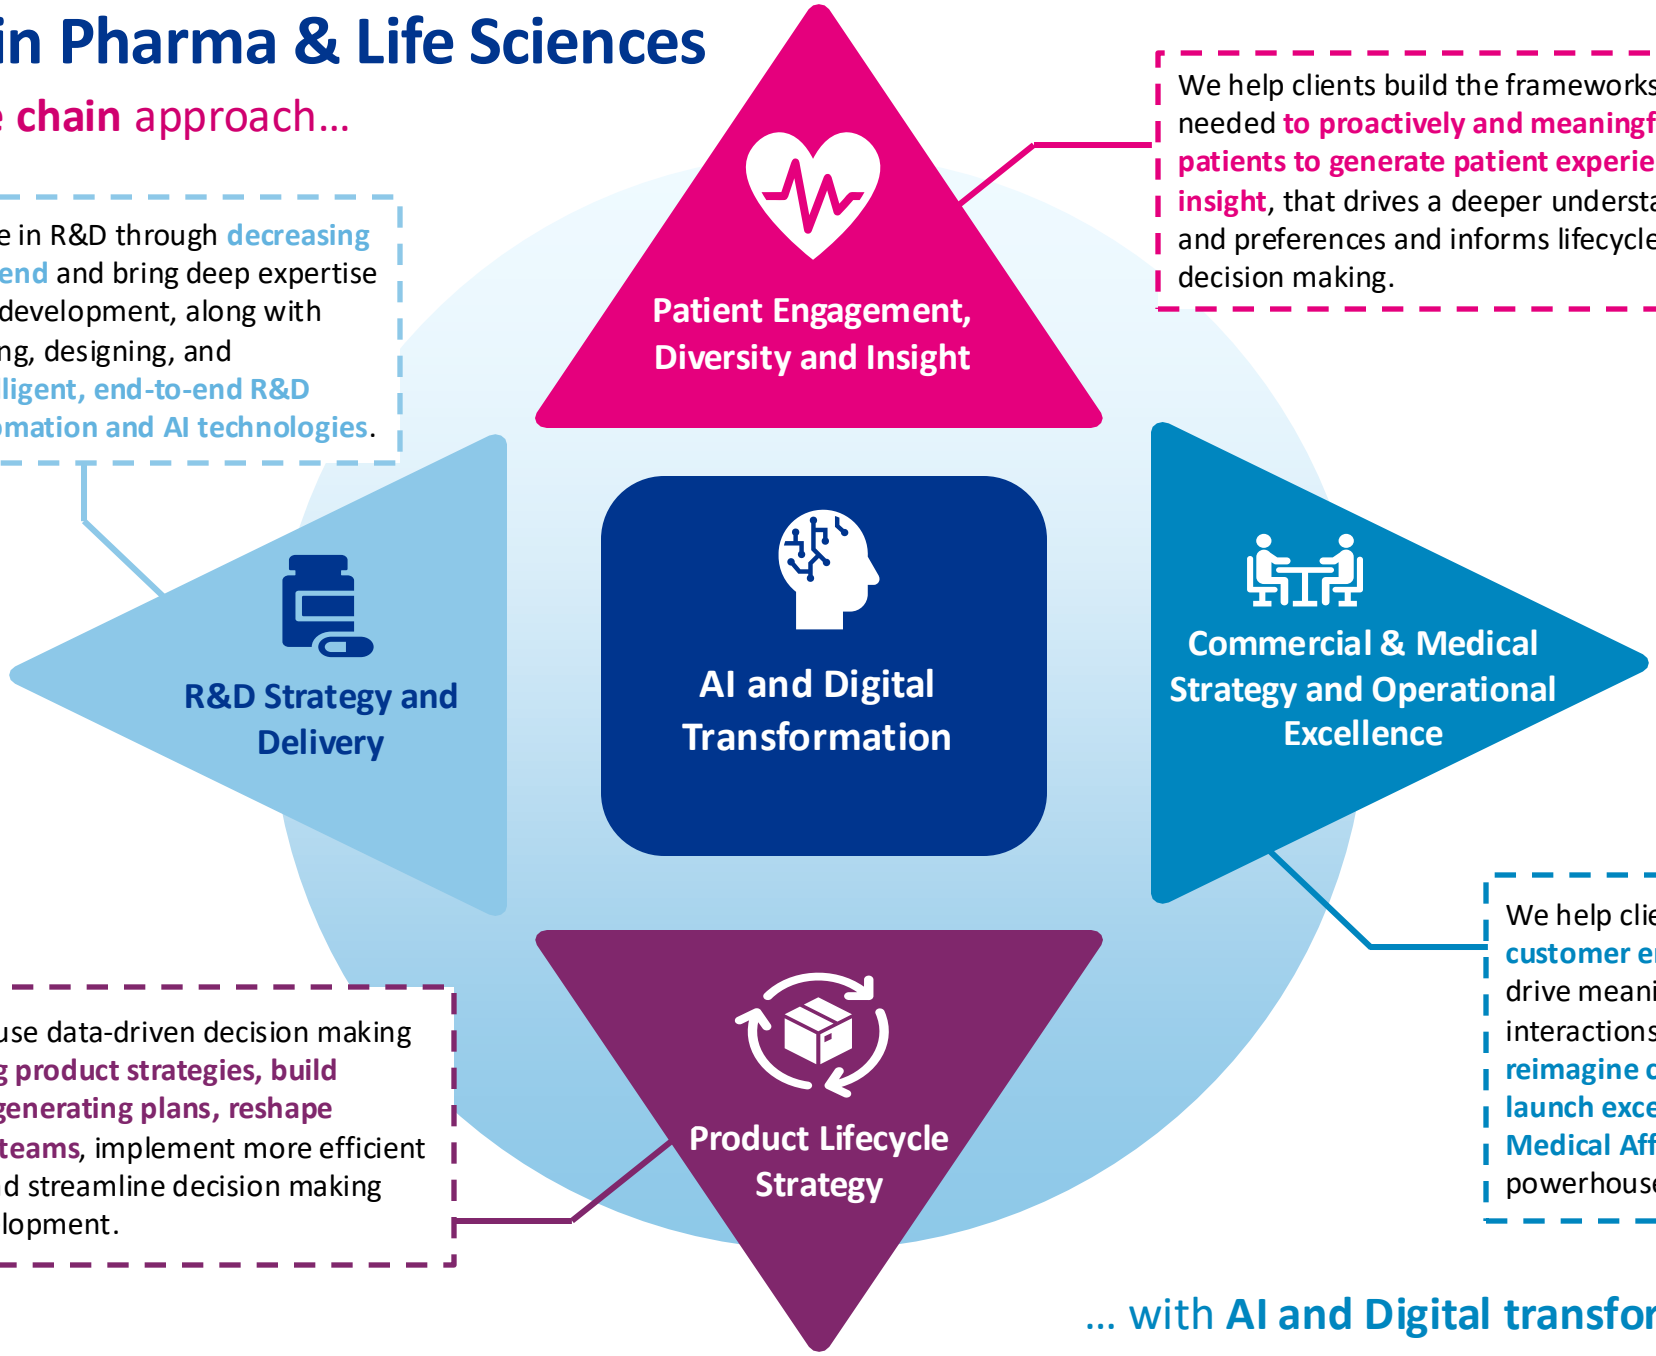
Baringa

Our strength in Pharma & Life Sciences

An **integrated value chain** approach…

We help clients to unlock value in R&D through **decreasing cycle times and optimising spend** and bring deep expertise and knowledge across clinical development, along with practical experience in assessing, designing, and implementing **simplified, intelligent, end-to-end R&D processes augmented by automation and AI technologies**.

We help clients build the frameworks and capabilities needed **to proactively and meaningfully engaging patients to generate patient experience data and insight**, that drives a deeper understanding of their needs and preferences and informs lifecycle activities and decision making.



We help clients design **next generation customer engagement models** that drive meaningful, personalised interactions across all channels, **reimagine commercial operations and launch excellence**, and **transform Medical Affairs** into strategic powerhouses.

We help clients to use data-driven decision making to **develop winning product strategies, build focused evidence generating plans, reshape product and asset teams**, implement more efficient ways of working and streamline decision making across clinical development.

Baringa

… with **AI and Digital transformation** at the core
