Driving better-informed decisions & actions for business operations

Do you face these common challenges on your packaging lines: Data that is outdated and landlocked? Lack of visibility into your line systems? Disaster recovery preparedness? How to identify the right improvement areas to increase productivity? How to move the business towards being an Industry 4.0 solutions provider?

We have a solution for you! Discover what’s possible and unlock greater value in your investment with Systech Insight™.

Unlock greater value in your investments

✓ Deploy automated tools for hands-off time savings.
✓ Transform your IT landscape from pieces of software to peace of mind.
✓ Enjoy data presented in an easy to understand, digestible format.
✓ Have information available to those who need it when they need it.
✓ Get more value from your regulatory packaging data.
✓ Make your packaging operations better.

Powerful business insight

Systech Insight is an intelligence platform that leverages the solutions already implemented on your packaging line to deliver operational intelligence, business intelligence and management intelligence. Systech Insight provides you with the tools to make better-informed decisions and actions.

**Operational Intelligence**

“Make informed decisions with minimal response time resulting in smooth operations.”

– Packaging Operations

**Business Intelligence**

“Collect and share critical data with minimal effort for long-term storage.”

– Business Systems Analyst

**Management Intelligence**

“Standardize and reduce variability with line efficiencies such as loss in run rates or increase in waste.”

– Site Director

Reduce system monitoring activities by up to 80%

Reduce manual data collection hours by up to 60%

Perform verification and release remotely to reduce batch release notification times up to 25%
Full functionality in one powerful package

What does it cost your business to customize disparate systems? Imagine having all functionality in one package. With Systech Insight, you can leverage your existing investment to unlock additional value. Systech Insight collects and stores critical data with minimal effort for you to access when you need it, how you need it for smoother operations.

* Custom integration required

Visualize your packaging operations to drive better informed actions and decisions.

Software management
Consistent software versioning and proactive maintenance. Cuts upgrade planning by up to 80%.

Interactive dashboards
Again insight into production and improve future state. No custom integration required. Packaging information is collected and available for immediate use.

Real-time batch progress monitoring
Visibility into every site, every line in one place. Reduce the number of progress requests to the packaging floor operators.

Systech Insight shifts your operations from reactive to proactive with agile systems focused on automation. Analyze and coordinate your resources with real-time end-to-end data for a holistic view of production. It provides up-to-date configuration archives and change control alignment—accelerating your business to an improved state.
